Concerning the Conscience Teaching

Yoneq feels STRONGLY that we have missed it in the training of our children in too much academics* and neglecting the teachings and the word of God. Our children love the world because we teach them too much of the world and not enough of our God's mind. He said long ago to teach from the Bible, but many people resisted this. Now we are seeing the fruit of that mind in our children. He now wants us to do what he said in the beginning and teach the children from the teachings and the Bible. Here is a teaching that he wants to be taught to all the children who are old enough. And make sure the teachers realize that *even quite young children can learn from this*. This is just one of many teachings that should be broken down for our children. Please get this to all the tribes with Yoneq's desire about our children.

**"Too much academics" does not mean the training of our children to read fluently, write neatly, spell, punctuate, and form sentences properly, and speak with confidence. It does not mean basic mathematical problem solving. "Let the reader understand." The problem lies in adding "interesting information" that is not essential to training them for their created purpose, in order to "make learning fun" and "hold the children's interest" as we learned in the world (Isaiah 2:5-6 NAS — "influences"). What would have been the outcome if we had done these things (basic academic training) without neglecting the weightier provisions of the Law (Deut 6:4-7; Gen 18:19)?*
