

Paris, First Day March 10, 1991

**Haggai** - What is the difference in our lives now from before. A picture came to me of when we make furniture. We put a coating on it. Once it is in, it's in. It changes the look of the wood. You cannot get it out if you wanted to. The oil goes in and you cannot take it out. The oil we received changed us. It is not something that is just on the top, on the surface of us, but it is in us. We have to show the riches of that oil in us - the aspects of our lives that are nicer now than before. That is the witness - how people can see the oil in our lives. The oil shows the Holy Spirit. In the early days of Israel, the kings were anointed with oil. In Psalm 133 oil upon the head is compared with brothers dwelling in unity; it is beautiful. We received something new that cannot be taken away from us. That is what controls our body, what moves us. We spoke about the breath this week, having the breath that gives life. It motivates the body, the wholeedah. If we have no breath we are dead. That is what we see here - people who do not have that breath in them. They do not express life; we sense death in them. But the breath brings life to each part of the Body, like oxygen, to each part of the Body, nourishing each part, bringing life to each part.

Because if our purpose is not to be a light, it will be vain. If today, we do not live for the glory of our Master we will live in vain today; we will be just a community today. There is only one community that brings glory to our Father, the one that bears much fruit.

**Yacob** - If we are kind, etc, to one another, then people can see a light.

**Caleb David** - This all reminds me of Galatians 5 which talks about the fruit of the oil, that breath that we received. Somebody asked me about what kind of spirit we had. One thing that amazed me on this trip was that the people doing the worst thing, they looked so nice. Galatians 5:23 - Nobody knows what love is except us. Our Master showed us what it is. It is laying down your life for your friends. You can outwardly appear to be gentle and peaceful and have joy, but can you be faithful? (That is a fruit also). And have self control? I'm thankful for the spirit we have received. I know I'm not perfect, but I have the desire to let the Spirit rule the innermost being, like we heard, to allow Him to come into the very center of us.

**Ha emeq** - It is just like the dry wood Haggai was talking about. The dry wood is not so nice, but when the oil goes on and it goes in and brings out the beauty of the wood and then you see it and say, 'how beautiful when the oil is in, then something comes out so pretty. That is the Holy Spirit. Our Father created people to be loving, joyful, patient, etc. but we cannot do it without the Holy Spirit. But when He goes into us and rules in our life everyday, then it can come out and be the way He created us to be.

Sometimes you meet really nice people, but they cannot be patient, or they cannot love or have joy or self control. They are just dry sticks. Psalm 133 - Like oil on the head flowing down, is like brothers together in unity. We cannot dwell together in unity without love, joy, patience, self control, etc. because we would walk out on each other. Without the Holy Spirit we cannot do it. But with that oil, the fruit of that oil, we can dwell together in unity. Luke 11:13

**Yacob** - If we are diligent, we can endure until the end when our Master comes back.

**Haggai** - We do not see it, how it works, but it is such a great miracle that we stay together. Because everybody has something else going on in his mind, and each has a different character. I really see it that it is the victory of YAHSHUA that we stay together in unity. This week we stayed in unity because we all have our eyes on the same things. People ask, "Don't you fight and separate when you think differently?" But we give up our thoughts for the sake of our unity because our unity is the "most" precious thing. He is forming a new nation. It is very hard because we have been brought from all different nations. There are all different tendencies from this, but we are going to have the tendency to love one another and stay in unity with each other and that is going to be the mark of our nation.

**Yacob** - I thought about Tabitha's Place this morning, how there were 150 people there, brothers and sisters, totally different and I know we want to stay together and love one another. It is beyond me, it is amazing to me. It is the greatest miracle in the world. Going to the moon is nothing compared to this.

**Haggai** - Today we have one more day. We can only be one by His oil, by His power, by the Ruach Ha Kodesh in us. Because as soon as we think we stand, then we fall, because we stop seeking Him.
